

## UNCLE SAMUEL NOW PROBING COST CLOTHING

Department of Agriculture is Endeavoring to Determine Reason of High Prices

WASHINGTON, June 14. — Uncle Sam's department of agriculture does work of many interesting sorts, its ramifications extend in divers directions, not solely included under the subject of agriculture, and one of the most helpful of these is aiding in the subjugation of the still high cost of clothing. A recent publication of the department declares that the business girl, with a reasonable amount of spare time to such effect that she can cut in half her clothes bill. In the first place, says the circular, she must be granted that the important way to reduce costs is to eliminate as far as possible the items of labor and distribution. In other words, the business girl should make her own clothing, otherwise, unless she is a wizard at nosing out bargains, she stands little chance of reducing her clothing budget.

The business girl may claim, says Uncle Sam, that she has not the time or energy left after a strenuous day's work; but a skilled sewer who employs sewing as an interesting and profitable change of occupation can always find time and energy. In this connection, the department cites the case of a girl in a government department, who, with the aid of circulars and extension work of the department, was very successful in keeping her wardrobe supplied at comparatively low cost, one-third in fact, what the same clothing would have cost ready made.

To begin with, she got a department circular telling how to make dresses from by pasting layers of gummed bundle wrapping paper over a tightly fitting vest on herself as a model. When the paper casing was cut off and fastened together, she had a light, stiff and perfect reproduction of her form. So it was not necessary to purchase a store fitting.

The girl reported that her latest wardrobe cost her \$108 for clothing conservatively estimated to be worth \$210 at store prices. With the aid of her paper form she made for \$24.61, a tan broadcloth winter coat with good lining such as she saw priced at \$50 in the shop. A blue voile dress with a slip cost including trimming, \$11.09. A tissue gingham dress, with organdie for trimming and also hemstitching, cost \$6.33; with scraps and a remnant she made another gingham dress for exactly 45 cents. For \$16 she bought materials to make a pussy willow taffeta and georgette crepe dress for social occasions, which, she said, she could not duplicate in quality at a store for less than \$35. Her business dress of serge and crepe de chine would have been priced at \$40 or more if made of the good fabrics she bought for \$18.39. Her evening dress, also, of taffeta and silver lace, cost only \$21, although it was modelled after one seen at a shop at a much higher price.

This wardrobe augmented by two dresses for which materials were bought, brought the total up to \$108.34. Is not elaborate, though sufficient for the needs of the wearer, it was said, and having a variety of clothing she was able to attend many social functions she otherwise would not have.

Without the dress form, the girl reported, it was doubtful if she could have duplicated her achievement in the time at her disposal; but she not only had time left over for other activities, but also to make ten such forms for other girls and to hold classes to teach many others.

## DEVELOPMENT OF PALESTINE IS ADVANCING

Two Thirds of Enterprise By Jews Started Within the Last Twelve Months

JERUSALEM, June 12.—(Associated Press by Mail.)—The industrial development of Palestine under the Jews is moving forward in leaps and bounds, and this in spite of the many trade quarrels that have sprung up of late between employer and employee.

During the past year no less than 4000 licenses were issued for new trades and industries in Palestine. The extent of this development can be judged from the fact that prior to 1921 only 250 licenses were registered by the government. This means that nearly two-thirds of the enterprises in Palestine were started within the past year.

The capital invested in each of these new ventures ranges from \$20,000 to \$50,000, but with such notable exceptions as the Silicate company, of Jaffa, with a capital of \$500,000, and the Standard Oil company now exploiting the Dead Sea Basin.

A tract of 53 acres of land has been bought by British Jewish interests and will be devoted to home and factory building, while American interests are starting a building and loan association and a savings bank. A casino, two bathing establishments and electric lights are among the attractions of an "American" seaside resort, which has sprung up on the sands stretching to the north of Jaffa.

In reality this is a Jewish township and its local name is Tel Aviv, but to a visitor it appears a go-ahead American town with a spirit that overcomes all obstacles. It has more than 12,000 inhabitants and an immense brick factory working night and day.

## POLAND HAS SIGNED TRADE AGREEMENT

WARSAW, June 19.—(Associated Press by Mail.)—The Polish foreign office in publishing the ratification of the Franco-Polish commercial treaty, announced that Poland has now signed trade agreements with nine other signatories: Italy, Czechoslovakia, Rumania, Hungary, Austria, Mexico, Spain, Portugal and Yugoslavia, and is making negotiations for similar treaties with England, Japan, Switzerland, Sweden and Norway. Pourparlers with Germany and Russia also have commenced. While no formal treaty has been made between Poland and the United States, an agreement has already been arrived at.

The Bonanza is not afraid and dare print all the news.

## SWEDISH SHIPPING GROWS PROSPEROUS

STOCKHOLM, June 29.—(Associated Press by Mail.)—Less than 5 per cent of Swedish shipping is now idle, according to the latest report of the Swedish Shipowners' Association. This report shows a sharp contrast to conditions of a year ago, when in June Swedish shipping depression reached bottom work with over 44 per cent of the men employed laid off. The report of the Shipowners' Association covers only its membership, but virtually all of the country's shipping is owned by members of the association.

The recovery of Sweden in shipping is based largely on the country's approach to normal in many of its most important industries and the rapid increase in exports.

## FOODSTUFFS SHOW DROP IN PRICES

MOSCOW, June 15.—(Associated Press by Mail.)—For the first time in several years prices of the two staple foodstuffs, bread and meat, have shown a slight drop in the Moscow markets. But other staples, such as sugar and butter, are rising. Simultaneously the Soviet ruble which for more than a month has stood at about 4,000,000 to the dollar, advanced in value to the ratio of 3,500,000 to the dollar.

A number of factors contributed to the drop in bread prices, among them being the open sale on the markets of the contents of American relief administration food packages, and the arrival in Moscow of grain from abroad.

Prices are dropping also in the famine area, and in the country they are gradually becoming lower than in Moscow.

## PARIAH DOGS NOT AT ALL EXTINCT

CONSTANTINOPLE, June 21.—(Associated Press by Mail.)—Constantinople's hordes of pariah dogs have by no means been exterminated. Thousands of them, ownerless and hungry, roam the streets and constitute a menace to pedestrians. More than 450 persons are now being treated in the Pasteur institute here for bites from these vicious animals. A new campaign for their suppression has been inaugurated, but the Turks are proverbially humane and sympathetic to all animals and hesitate to put the dogs to death. Many of the beasts are being removed to the numerous barren islands in the sea of Marmara, where they meet death by starvation.

## RUMANIA FEARS RUSS INVASION ON FRONTIERS

Not By Armed Men, but By Starving Thousands Who May Be Driven Out

BUCHAREST, Rumania, June 21.—(Associated Press by Mail.)—Rumania considers that her frontiers are threatened with a Russian invasion, not necessarily of armed men, but rather by starving thousands who may be driven in August from the Volga basin by crop failures. She fears a repetition of the movement of the trekking multitudes which left the Volga last summer, driven out by hunger.

What steps should be taken if this happens? These people cannot be shot down with machine guns as they cross the boundary line, and it may not be possible otherwise to stem the flow to any appreciable degree for the frontier is long and the Rumanian army is not large.

Poland is equally interested with Rumania. She is subject to the same invasion. The recent visit here of President Pilsudski of Poland, was to consult as to a course of mutual action. In August, the Rumanian and Polish crops will be ready for harvest, and neither country wants its food supplies to be depleted by thousands of Russians who may make a last effort to save their lives.

Rumania today has six army divisions on the Danester frontier, and even so many hundreds Russians are slipping over the boundaries each week.

## KING BORS RUMANIA LIKES ALL AMERICANS

SOFIA, Bulgaria, June 20.—(Associated Press by Mail.)—King Boris would be glad to have American tourists visit this country. I have met most of the Americans who have been here since the war," said Boris to the Associated Press correspondent, "and so far as I know every one has like for our people and the scenery of our mountains. Indeed, I wish more Americans would come here on business and stay with us."

King Boris makes it a point not only to receive in audience Americans who come here, but in many cases he invites them to visit him at his country home, or else to travel and hunt with him.
